Comments: I am very concerned about the proposed project and I strongly oppose it. This is a threat not only to the Holy Cross Wilderness, but other Wilderness areas across the country. If this project goes through, what's to stop other projects being implemented in other Wilderness areas? The creators of the Wilderness Act knew that our country needed areas "untrammeled by man" to play in. Moving forward with this project goes directly against the intention of the Wilderness Act. I urge you to reconsider moving forward with this project to protect the Holy Cross Wilderness for generations to come.
