Comments:

I strongly oppose the requested special use permit (SUP) and related Categorical Exclusion (CE) for geotechnical investigations in connection with Homestake Partners' proposed transmountain diversion of water from Homestake Creek in the Holy Cross Wilderness for the Whitney Reservoir project.

I oppose both the SUP/CE and the underlying proposed Whitney Reservoir project.

The proposed work also is a critical step in advancing the Whitney Reservoir project, which would require making a Wilderness boundary "adjustment" to reduce the Holy Cross Wilderness by almost 500 acres. I oppose reduction of any federal Wilderness Areas, and especially the unique Holy Cross Wilderness which is already being dewatered by the Homestake Partners.

I am deeply concerned about the Whitney Reservoir project's impact on the environment and the complex fen wetlands. These wetlands are some of the finest of their type in the entire White River National Forest. Reclamation and restoration of complex fen wetlands has not been proven to be possible.

Most importantly, the communities of Aurora and Colorado Springs should take action to reduce their water needs, and not destroy our Wilderness. Water should be rationed before considering the destruction of our state's unique beauty.

Thanks for your consideration,

Frank and Myra Isenhardt
