Comments: Why would we approve another Dam. The Headwaters of the Colo are already over stressed.

Shadow Mountain Lake, which is fed by the headwaters, is already on the endangered (303) list. We have to stop raping the land.

I strongly oppose the SUP and CE in connection with the proposed cross mountain diversion--I strongly oppose the roads and the drilling and the impact on the Holy Cross Wilderness. What about the fen wetlands?

Trump will be gone soon enough. Let's quit cow-towing to him now. Mother Nature needs our help and this ongoing intentional destruction of our Headwaters is disgusting.

Let's do the right thing now!!!
