Comments: These cities CANNOT be allowed to forgo any kind of preliminary preparations (environment impact statements, analysis, etc) or be given any kind of exclusionary status.  By doing so they are trying to get around PROPER procedures.

This is a direct assault on the Wilderness Area and a dangerous precedent for all Wilderness Areas across the nation. Further, if the project is built, it could drain nearly 10 billion gallons of water/year out of the headwaters of the Colorado River.

Please make sure that things are DONE PROPERLY by those cities whose proposals will so NEGATIVELY impact the wilderness areas that are being discussed!!!
