First name: Leif

Last name: Sunde

Organization: Denver Sports Lab

Title: President

Comments: The immediate and long term affects of this development are unacceptable. There must be consideration of the community value of land use in its current state to discount against the perceived future value of this type of development. There HAS to be multiple alternative locations that would have a more suitable future as a reservoir to service these downstream stakeholders, without destroying an existing land area which offers such rare and intrinsic value to the public, environment, and future.
