Title:

Comments: I'm writing about North Fork Nooksack Vegetation Management Project #58218 in the Mt. Baker-Snoqualmie National Forest.

I support comprehensive restoration actions to improve forest health and strongly oppose the massive 1,900-acre clearcut around Canyon Creek that was recently proposed.

Implementing the Nooksack Integrated Restoration and Enhancement Project should be the priority action for Canyon Creek and elsewhere in the Nooksack, not a massive clearcut.
