Title:
Comments: Do NOT allow this project to happen. There is already plenty of clean water coming out of this area, it would be foolish to destroy pristine wetlands, our clean water factories, in order to drill exploratory holes. I have seen beavers, moose, elk and myriad other wildlife in this area. If we decimate every large alpine valley in the name of progress, no longer will the wildlife we share this world have a place to live. If cities below need more water for their ever growing populations, let them find it elsewhere. Wilderness is suppose to remain untouched, you better not let my public land be destroyed for something so short sighted.
Adam Willett
