Title:

Comments: As an avid angler with a family of four and user of not only the Eagle River, but the Holy Cross Wilderness, I strongly object to this project as described. Any more diversion of water from the Eagle River Valley is a mistake and will negatively effect the Colorado River Watershed and our beloved rivers and fish habitat. Not to mention further exacerbating potential droughts to come in the future. Have we already forgotten about our terrible fire season two years ago. Please, on behalf of everyone living in the Eagle River Valley, deny this project!
