Title:

Comments: Please do not create a reservoir in the Holy Cross Wilderness. We have so few places left that are relatively untouched by humans and this would be a major disturbance for the wildlife in the area; especially boreal toads and other aquatic life. I live nearby and love to recreate in the lushness of the Holy Cross Wilderness. Each year, i see less and less snow and it melts faster and faster. We need to find ways to conserve water, not make it easier for megalopolis' to steal water from the mountains. I am wholly opposed to any reservoir, dam or other man made disturbance in the Holy Cross Wilderness.
