Comments: I am deeply disturbed by Project #58218. Despite the soothing language of the description at <https://arcg.is/yHC49>, I am not convinced that 1860+ thinned/clear-cut acres is an "improvement" to the forest's health, nor do I trust that the environmental regulations in place will substantially mitigate the destruction in store: we have seen this pattern of reassurances followed by harm far too many times. I strongly urge that a more thorough EIS be done. I strongly urge that those deciding the fate of this section of forest deem the environmental impacts to be more significant than the profits to be made.
