Title:

Comments: Please do not go ahead with this drilling or dam project. Destroying and taking back Wilderness areas is not why they were preserved in the first place. Too many of our countries environmental rights are being ignored and rolled back at this time, and this drilling project goes by and in hand with how the president is treating our environment.

Dams do not work well, and they constrict the normal flow of the rivers and eco system.

Please do not go forward with this drilling. Please.
