Title:

Comments: Please do not go ahead with this drilling or dam project. Destroying and taking back Wilderness areas is not why they were preserved in the first place. Too many of our countries environmental rights are being ignored and rolled back at this tome, and yhis drilling prohect goes by and in gand woth hoew the president is treating our environment.

Dams do not work well, and tjey constrict the normal flow of the rivers and eco system.

Please do not go foreard with this drilling. Please.
