Comments: To whom it may concern,
I strongly oppose the requested special use permit (SUP) and related Categorical Exclusion (CE) for geotechnical investigations in connection with Homestake Partners' proposed transmountain diversion of water from Homestake Creek in the Holy Cross Wilderness for the Whitney Reservoir project. The impact on the surrounding wilderness areas goes against the definition of wilderness outlined in the Wilderness Act. The following points are reasons why the construction of the Whitney Reservoir project should not be permitted.

- The requested SUP/CE would allow for up to a year of drilling, road construction, and cross-country travel by vehicles and equipment within the White River National Forest in support of the proposed reservoir and diversion project.
I oppose both the SUP/CE and the underlying proposed Whitney Reservoir project.
Diverting even more water out of the headwaters of the Colorado River is a terrible idea.

- The proposed work also is a critical step in advancing the Whitney Reservoir project, which would require making a Wilderness boundary "adjustment" to reduce the Holy Cross Wilderness by almost 500 acres. I oppose reduction of any federal Wilderness Areas, and especially the unique Holy Cross Wilderness which is already being dewatered by the Homestake Partners.

- I am deeply concerned about the Whitney Reservoir project's impact on the environment and the complex fen wetlands. These wetlands are some of the finest of their type in the entire White River National Forest. Reclamation and restoration of complex fen wetlands has not been proven to be possible.

- The communities of Aurora and Colorado Springs should take action to reduce their water needs, and not destroy our Wilderness and rivers.

The Homestake Creek valley is an area that I considered to be my outdoor playground. I personally enjoy hiking and camping in this watershed. The construction of an additional dam in this valley would severely damage the natural beauty, solitude, and wildness that can be found in the area.

Thank you for your consideration,
Lara Carlson
