Comments: Hello,

This comment is being submitted against this logging proposal. This region is incredibly important to keep intact and free from clear cutting practices. An EIS must be done. No new logging roads, no clear cutting, and no thinning in this area please. I am a concerned citizen who believes strongly in the protection of forests for their inhabitants, their carbon sequestration ability, and the trees themselves. Protect the north fork Nooksack river and the Mt. Baker-Snoqualmie National forest please!
