Comments:

I strongly oppose the requested special use permit (SUP) and related Categorical Exclusion (CE) for geotechnical investigations in connection with Homestake Partners' proposed transmountain diversion of water from Homestake Creek in the Holy Cross Wilderness for the Whitney Reservoir project.

The requested SUP/CE would allow for up to a year of drilling, road construction and cross-country travel by vehicles and equipment within the White River National Forest in support of the proposed reservoir and diversion project.

I oppose both the SUP/CE and the underlying proposed Whitney Reservoir project.

The work to be done under the proposed SUP/CE would cause significant damage to an ecologically unique and sensitive area, popular with outdoor recreationalists.

The proposed work also is a critical step in advancing the Whitney Reservoir project, which would require making a Wilderness boundary "adjustment" to reduce the Holy Cross Wilderness by almost 500 acres. I oppose reduction of any federal Wilderness Areas, and especially the unique Holy Cross Wilderness which is already being dewatered by the Homestake Partners.

I am deeply concerned about the Whitney Reservoir project's impact on the environment and the complex fen wetlands. These wetlands are some of the finest of their type in the entire White River National Forest. Reclamation and restoration of complex fen wetlands has not been proven to be possible.

The communities of Aurora and Colorado Springs should take action to reduce their water needs, and not destroy our Wilderness.

In addition to the above comments, it is my understanding that a wilderness area boundary cannot be changed without an act of Congress. Taking 500 acres out of a Wilderness area is unacceptable. With the current political climate, I am very concerned that other Wilderness areas could be endangered. But it is unacceptable to even be considering such a proposal.

Also, do not try to uncouple a permit for drilling to determine the best location for a dam with building the dam. This is just plain gaslighting, and this is, also, completely unacceptable. If a permit for drilling is acquired it is a significant step towards building a dam period.

Thank you for reading my comment. I truly hope this project is not allowed to go forward for all the reasons mentioned above.
