Title:

Comments: This proposal is completely incompatible with virtually all the current values and uses of the area. It ignores scenic values, fish and wildlife values, watershed values, and recreational values. It goes against many years of managing the area for it's scenic values and recreation interests. Road building in the the area would be a complete travesty, The project proposal at the very least MUST have a complete and thorough EIS completed. Any short term economic benefits from logging would be short lived with long term consequences.
