Comments: North Fork Nooksack Vegetation Management Project

Hello,

I am a resident of Glacier, Washington and would like to voice my opposition to the forest plan amendment that you are proposing. The rest of the project seems fine, but amending the forest plan to create Huckleberry Habitat is BS in my opinion. We have a Forest Plan for a reason, and changing it to sell timber contracts is not part of the plan. If your true goal was Huckleberry Habitat you would cut the trees and leave them on the ground, as that is far more beneficial to the ecosystem. That you are removing the timber for profit, is a clear indicator of the true motive behind this Amendment. Namely, selling Timber Contracts. Please do your duty and follow the established Northwest Forest Plan's management objectives, amending them for a small profit is pure negligence. Thank you,

Grady McCombs
