Title:
Comments: Threatened species need all the habitat they can get, and ski resorts do not justify destroying it. I learned to ski at Purgatory and will always love that mountain, but this is unacceptable. As climate change threatens our environment and skiing as an industry in itself, it seems like a poor time to expand the mountain anyway. A full environmental review is necessary for business to be done ethically on public lands. This project is unnecessary and ill-advised on many levels.
