Title:

Comments: I write as a resident of the South Fork Valley, where my family and I have owned and operated a vegetable farm since 2002. the Mount Baker-Snoqualmie National Forest is important to me and my family business as the area under proposed logging is the headwaters of the watershed on which the people, plants, and animals of Whatcom County depend. I ask for a full environmental review of this proposal for the following reasons:

-Due to the huge scale of proposed logging in this proposal, its radical departure from previous Forest Service management direction, its controversial nature, and negative impacts on local communities, an Environmental Impact Statement (EIS) must first be completed.

- The Forest Service must fully weigh the importance of this National Forest for reducing the existential dangers of climate change to both our regional ecosystems and human communities. Logging these forests defeats their carbon sequestration potential for decades to come.

- In the face of extensive and ongoing clearcutting operations on private and state timberlands nearby, the Forest Service must prioritize allowing our National Forest to mature naturally for carbon capture, clean water, sensitive wildlife habitat, and compatible recreation.

- The Forest Service must not construct new logging roads, including so-called "temporary" roads, which act as vectors for invasive weeds and human-caused abuses (including fires), while fragmenting habitat. Instead, the Forest Service should permanently close unneeded decaying roads.

Sincerely,

Nicole Brown
