Comments: I'm concerned about the trout habitat. In my research I've concluded that it is vital to protect the habitat that protects a natural low-impact protein source for the US.

I cannot support this endeavor at this time, and ask you to pause or stop the progress until it is clear that any expansion would minimize deforestation, would completely protect trout habitat, would not adversely affect current wildlife diversity and health, and establish the expected lifespan of this modification considering global warming.

I understand the desire to move the ski operations to higher elevations. Why not move forward with the Town of Silverton and their call for ski area investment?
