Comments: Hi,

I think this process is trying to be shoved thru before the proper environmental studies have been completed. Fish and Wildlife is in the process of doing a Lynx habitat and activity study and this project should be tabled until that analysis is completed.

If I am correct, you at forest service must also request a complete climate change analysis. So that too needs to be completed before any decision can be reached to allow this project to continue.

It is NOT RIGHT to let corporate priorities come before our natural environment, and the wildlife that inhabit it. These areas and animals need our protection so that future generations will continue to be able to enjoy them.

Thanks for the opportunity to comment on such an important issue.
