Comments: Thinking forward towards the ENTIRE area not just Purgatory... I think expansion on an all ready stressed community is an extreme lack of foresight. It seems as though other ski areas have already gone to a reservation system to keep the quality of the whole experience good. The infrastructure of our roads systems and parking is already maxed out....there are some things we just should say NO to. the continued expansion of Purgatory goes further than the SUP area identified...the continued expansion of trail systems that route back to Purgatory is detrimental to wildlife movement and the purpose of creating the Hermosa Wilderness. The lack of care with various junk piles behind each lift area is not encouraging. The lack of respect to our environment and the continuous development of a carnival atmosphere in a mountain community is for only one reason...money. We should become a community that cares about the environment.
