Comments: To Whom It May Concern,

Hello and thank you in advance for your time and effort regarding this proposed project. I am overwhelmingly in favor of this proposal. The reason being my selfish desire to keep the city of Steamboat Springs a vibrant and thriving town, which this will help to do. More skiing equals more people equals more ability for airline services. In addition I really enjoy this proposal for increasing the beginner trails on the mountain. My wife son and I all learned to ski here 2 years ago, me at 44, my wife at 45 and our son at 9. We now are mostly blue runs mixed in with a black diamond or two. That said since currently only 20% of the mountain are green beginner trails this would help broaden then appeal of the ski resort. Lastly, even with the expansion the forest and hiking trails at fish creek falls and the uranium mine trails would be undisturbed by this, which is also very important to us as we are avid hikers. Thank you very much again for your consideration. Stay safe and healthy!

Jay
