Comments: To whom it may concern. I a writing to share my passionate support for the subject improvements for the Steamboat Ski Resort area. The new equipment, terrain, and advancements will draw more visitors to the area. The tax and economic impact on the local economy would be increased significantly. Further, should the COVID-19 pandemic continue to impact occupancy levels, the larger ski area will likely still allow for more visitors than today. The impact on the environment will be minimal as the improvements noted are areas backcountry adventurers already travel. We are frequent visitors to the county (all 4 seasons) and look forward to making the visit even more exciting in the future.
