Comments: North Fork Nooksack Vegetation Management Project

Dear District Ranger Uloth,

I support the North Fork project for two reasons. 1) as a outdoor enthusiast I understand the value timber harvesting provides to the hebetate and the health of the land. 2) I've worked in the Timber industry for 40 years, have raised 4 children and was able to put them through collage/trade schooling. Timber harvesting / Vegetation management is not only the right thing to do for the land but it also provides great economic benefits as well.

This comment is to support the North Fork Nooksack Vegetation Management Project and the plan to use various forest management tools to ensure a healthier and more resilient forest. In addition to providing timber to support our communities, this project will also make these public lands more accessible to all forest users. Vegetation management will support native plant and animal species who will benefit from the creation of both early-seral habitat and older mixed age and species forests.

Timber harvest and commercial thinning will help achieve the objectives of this project. Commercial activities will provide the funding necessary to fix deteriorating forest roads as well as to support non-commercial restoration work on the national forest. Generating revenue, improving access, and enhancing huckleberry production are positive steps the Mount Baker Snoqualmie National Forest can take in meeting its management goals.

Please move forward with this project, using the various forest management tools that are available to the Forest. This project will benefit all the various uses of our forests, benefit local communities and the various wildlife using the Forest.

Sincerely,

Tom Herrin
