Arrastra Creek area deserves Wilderness status to protect vulnerable threatened wildlife species.

Badger Two Medicine area: apply protections as advised by the Blackfeet Nation and do NOT allow any mechanized travel. Cultural resources must be protected here to the utmost extent!

Big Snowies -- give this area Proposed Wilderness status and ensure non-mechanized travel. Conflicts with bicycles and horses MUST be avoided.

Crazy Mountains -- need Primitive Area ROS classification. This unique mountain range is unlike any other in Montana and needs as much protection as possible to ensure its value to future generations.

The Elkhorn WMU was created to protect wildlife -- continue this mission by recommending it as Wilderness!

The Middle Fork of Judith River should receive Recommended Wilderness status -- this once vital trout stream needs protection not degradation.

Thank you for the opportunity to comment.
