We have had several issues of people coming into the resort area and using our bathrooms. With COVID rules in place, we are sanitizing and sterlizing all of the restrooms on the course (as well as the clubhouse) every couple of hours. The risks in place during these times of having people come in that are not part of the golf course environment brings added risks that are unacceptable, especially during these times.

Obviously, the safety of homeowners as well as guests of the golf course resort are put at risk from campers coming over here, period..

On more than one occasion, we have had to ask people to leave the premises that were not here with the proper intentions to put it mildly.

Thank you for your attention to this matter and I felt I needed to let you know that we have concerns as well here at the Golf Club.

Thanks again,
