Title:

Comments: concerned about the failing to include enforceable standards for migratory bison and their habitat, and Regional Forester Leanne M. Marten for failing to list American bison as a Species of Conservation Concern in Region One. Very upset over this, as the bison have been tortured for many, many years and it's about time someone steps up for them. I have contacted the governor, legislators, and just about everyone else to help the buffalo. So tired of the cattle industry and ranchers lobbying for their needs. Can't we all just get along???????????? The buffalo's disease has been around for years and years and years - everyone's excuse!!!! MAKE A DIFFERENCE AND DO YOUR JOB!!!! have also donated to the Buffalo Field Campaign many, many, many times along with friends to STOP THIS POLITICAL vendetta on the buffalo!!!
