Title:

Comments: I would like to object that there has been no enforceable standards for migratory bison and their habitat. I also object that Leanne Martin has failed to list American Bison as a Species of Conservation Concern in Region 1. The forest's preferred Alternative F is weak and objectionable on several grounds. For example, the forest continues to define natural migrations based on "management zones" that exclude bison from National Forest habitat. I urge you to adopt protective provisions for wildlife and habitat in Alternative D, and enforceable standards instead of weak desired conditions. I urge protections for the Buffalo, not more contributions to death and destruction.
