First name: Jonathan

Last name: Way

Organization: Eastern Coyote/Coywolf Research

Title: Founder and Wildlife Biologist

Comments: I am beyond frustrated that Custer NF doesn't have the forward vision to protect and allow all native mammals to roam. This is federal land. Stand up to the thugs in Montana (DOL) and do the honorable thing.

Protect bison. I am in Yellowstone area for a week and half this month and I come to watch wildlife with bison at the top of the list. I don't come to watch cattle, nor do most people.

It is important to treat bison as native wildlife and the park and forest service should be leading this cause not minority interests (the DOL doesn't even represent the average Montanan's perspective). It is imperative that you allow bison to establish year round populations on Custer and all of the surrounding NFs around Yellowstone and Grand Teton NPs.
