Comments: Hi,

I'm writing because I strongly object with Forest Supervisor Mary C. Erickson for failing to include enforceable standards for migratory bison and their habitat, and Regional Forester Leanne M. Marten for failing to list American bison as a Species of Conservation Concern in Region One. I wish for these things to be taken seriously and for standards to be set! We must protect those without a voice. The way people treat (Or neglect) their animals says everything about a country. We must stop being so selfish because it's their land and their lives just as much as it is ours. We must protect their rights and welfare because it's us who are the enemy and who takes it away.
