Comments: The Custer Gallatin National Forest has released a draft Record of Decision and Final Environmental Impact Statement for their forest plan revision.

I am writing to file my objections for failing to include enforceable standards for migratory bison and their habitat, and for failing to list American bison as a Species of Conservation Concern in Region One.

The forest's preferred Alternative F is weak and objectionable on several grounds. For example, the forest continues to define natural migrations based on "management zones" that exclude bison from National Forest habitat.

Please adopt the most protective provisions for wildlife and habitat in Alternative D, and enforceable standards instead of weak desired conditions.
