Comments: I am totally opposed that there are no enforceable standard for bison and their habitat which makes this an empty document.

I also am opposed to this bill for failing to include a listing for bison as a species as a concern for their conservation in Region 1.

Bison should be included in National Forest Habitat as these are public lands and the bison is our national animal and so I object to the weaknesses in Alternative F.

Alternative D has no enforceable standards to protect provisions for wildlife and habitat.

Quit wasting taxpayer money with these ridiculous phony efforts to protect bison.
