Title:

Comments: Dear Regional Forester Leanne Marten,

I write today to express my objections to the Custer Gallatin 2020 Land Management Plan (Final Plan) for failing to include enforceable standards for America's migratory bison and their habitat. These enforceable standards are essential to the existence and continued recovery of our migratory bison.

In addition, I object to your failing to list America's Bison as a species of conservation concern in Region One.

Please adopt the most protective provisions for wildlife and habitat in Alternative D and enforceable standards instead of weak desired conditions.

Please ensure that enforceable standards are included in this final Custer Gallatin 2020 plan.

Thank you for your humane consideration in ensuring the future of America's migratory bison which are important to the lands and other animals in the lands they travel.

Sincerely,

Joan Gove
