Comments: Dear Sirs, RE Helena Lewis Clark Forest Plan

I have had Wilderness Trips into the areas in and around the Badger Two Medicine Wilderness over the past 35 yrs. I strongly Believe the area must be protected from any activity (any vehicular traffic) that conflicts with wilderness solitude as this is the wish of the Blackfeet people. Also, while there will be no oil and gas leasing in the Badger there still should be an expression provided that states Oil and Gas leasing Is not suitable or compatible for this area. This expression should also be applied for any existing Wilderness Study Area (WSAs) as well until Congress comes to equitably decide the future of these lands. Also WSAs must be kept to their original condition when they were established as such (1977?) Thank you for your support
