Comments: Dear Sirs,

I have been signing petitions, making phone calls and writing comments for several years now in regards to how Bison are treated within The Yellowstone Area and their traditional territory.

I want to see the Bison treated as the Elk are treated-allow them to roam freely-since they do not consider boundaries-

I oppose the hazing, trapping and shipping of OUR NATIONAL MAMMAL and want you to begin to respect the Bison and their traditional migratory paths, habits and social structure.

Please help these iconic mammals to thrive and live in Peace-

Yellowstone is also ruining it's reputation by continuing to cater to ranchers, cattlemen and their evasive cattle.

Millions of Americans love the Bison-that is why the Bison is our National Mammal-they are a Species of Conservation concern and importance.

They are also a major tourist attraction and help generate revenue.

The Bison is part of our History, a Symbol of the Wild West and our Past-they were also almost completely eradicated-and we should know better than to use lethal, disruptive methods-In the 21st Century we should be using the Best available science, humane treatment and allowing Bison to be Bison.
