Comments: This is in regard to The Custer Gallatin National Forest's draft Record of Decision and Final Environmental Impact Statement for their forest plan revision, which is Alternative F (the preferred version). I am objecting to this draft because it does not include migratory bison, their habitat or listing them as a Species of Conservation Concern in Region One. Alternative F does not include bison in the "management zones" which are based on natural migrations. Alternative D is a much more acceptable plan as it protects wildlife and their habitats much more than Alternative F. Please adopt Alternative D so the bison and other wildlife can be more protected.
