Title:

Comments: I can not begin to describe how much work my colleagues and I have put into keeping trails open as winter Conditions and Spring storms continue to drop dead fall on our trails. However, with recent trail closures to motorized use it has been much more difficult or non existent on these trails. I echo the concerns as well regarding access to Rico in emergencies and the ability to maintain our trail system. My greatest concern is the loss of our trails due to the inability to utilize it because it no longer is maintained.

There are thousands of miles of trails in Colorado. Only a small portion are motorized. However, the vast majority of the trail work is performed by these users.
