Comments: The "Custer Gallatin National Forest" has released a draft "Record of Decision and Final Environmental Impact Statement" for your forest plan revision.

Our family is filing our objections with Forest Supervisor Mary C. Erickson for failing to include enforceable standards for migratory bison, and, their habitat, and, with "Regional Forester", Leanne M. Marten, for failing to list American bison as a "Species of Conservation Concern", in "Region One".

The forest's preferred "Alternative F" is very weak, and, objectionable on several grounds. For example, the forest continues to define natural migrations based on "management zones" that exclude bison from "National Forest" habitat.

We are continuing to push the forest to adopt the most protective provisions for wildlife and habitat in "Alternative D", and, enforceable standards instead of weak desired conditions!

My family and I are in strong support of the "Regional Forester" listing American bison as a "Species of Conservation Concern", and, having the "Forest Supervisor" adopt strong, enforceable, standards to benefit these migratory giants, and, connectivity to their habitat on our "National Forests"! THANK YOU!
