Comments: During scoping, I expressed concern that the Forest shares an issue with IPCC : "The IPCC format, perfected by the late Bert Bolin, is a painstaking self-interrogation process of the pertinent scientific community. In this process, virtually every stone in the cognitive landscape is turned and the findings, however mundane or ugly, are synthesized into encyclopedic accounts. Unfortunately, such an approach is inherently tuned for burying crucial insights under heaps of facts, figures, and error bars. "

Hans Joachim Schellenhuber.

"Global warming: Stop worrying and start panicking?"

Proceedings of the National Academy of Sciences 2008

[ open access ] <<<https://www.pnas.org/content/105/38/14239>>>

I'm still concerned about this shared problem. I'm not sure the Forest has an alternative format available, but, as written, the FEIS seems at risk of obfuscation at some expense to illumination.
