Title:

Comments: This is a comment in support of the proposed connector trail to connect the Festival/Narroback trail system directly to the Wolf/Lynn/Timber Ridge system in the GWNF/Stokesville area. As a frequent trail user in the GWNF & of this trail in particular, I fully support optimizing the trail for bicycle and pedestrian use.

Directional signs and a pedestrian bridge off of Tilman Road would increase usability and access for people of all fitness levels. I support additional signage as well to enhance the user experience.
