Comments: I am VERY supportive of this trail connectivity project. As a cyclist and runner, I am in love with the existing trails in that region, and very much encourage the connectivity opportunity to preview a single track, preferably bicycle centric, trail that connects these two trail systems. I hate having to ride the road between the trails. Connecting these systems with a sustainable trail that can be used by anyone takes the bikers, hikers and runners off the roads, increases the attractiveness of the area, and in turn will bring more attention to the area in a positive way.

Please allow this project to go forward. We need more trails to connect the existing ones to improve the interconnectedness of the region, and to reduce conflict on the roads.
