Comments: I am in support the project connecting the Western Narrowback trail (432) and would like to see more new trail construction along the Tillman Road Corridor. This trail would make it safer for bike riders to access the Narrowback trail from the (Wolf) parking lot rather than riding on Tillman Road. There is a need for more trails and better trail connectivity in the North River District of the George Washington National Forest and this project will help with connectivity.

The Narrowback Mountain trail system is excellent for intermediate and beginner trail visitors and is easily accessible compared to other trails in the forest. It is also close to the Forest boundary so as to cut down on drive time.

As outdoor activities gain popularity, especially in this time of the pandemic, good and thoughtful trail construction such as this will help with the health and well-being of people in the area during all seasons of the year.
