Comments: I support the project and would like to see more relocations of "legacy" trails and new trail construction along the Tillman Road Corridor. We heavily desire for more trails and better trail connectivity in the North River District of the George Washington National Forest, this project will help with connectivity.

The Narrowback Mountain trail system is a land of opportunity for intermediate and beginner trail visitors due to the unique position the Narrowback trail system holds compared to the many other more challenging trails in the Forest. More trails close to the Forest boundary would cut down on drive time, making an outdoors adventure more accessible.

There is a need for trails such as this one by SVBC that are less steep and constructed on a sustainable alignment. This will increase the accessibility of the trail and will also decrease the amount of maintenance required for the trail.

My girlfriend and I love riding mountain bikes and would love to be able to experience more of Virginia on two wheels. We are constantly getting friends to enjoy the joys of mtb and meeting new friends through the outdoor activity.

A critical fixture of this initiative is the ability to access trails from the (Wolf) parking lot rather than riding on Tillman Road.
