Title:

Comments: What is your problem? How can you in good faith work for the people and not list a native species habitat to roam and have it be a species of conservation concern. We need new officials if you can't follow the will of the people. The racist thugs at the Montana Dept. of Livestock should not be who you get your marching orders from. It should be the 100s of people that support free roaming wildlife, especially bison, on our federal lands. This disgusts me. Please get a new job and allow someone who is qualified to speak for native animals to work this position.
