Comments: I support the Tillman Trail Connectivity Project #58134. I feel this would be a huge benefit to the trail users that use these trails in GWNF. It would provide a valuable connection and gives the opportunity to make loops out of these popular trails. The current road option leaves the user needing to use multiple cars to make a loop out of this trail region. Or requires riding one's bike a long way around for the connection. I truly appreciate the Forest Service consideration on this project. I hope this can be a great option for all trail users.
