Comments: Hello,

I am writing in support of the Tillman Trails Connectivity Project #58134. The presence of mountain bike trails in Virginia, and especially the George Washington National Forest area, are a big reason why we ended up in Charlottesville. Any effort to improve the trails and make them more sustainable should be supported.

This project in particular has the benefits of making the trails more sustainable, which reduces maintenance time, and introduces more beginner and intermediate trail to the network. This increases accessibility for more stakeholders. Additionally, trails closer to the boundary of the forest reduce drive time, and better connectivity can reduce the need to ride on roads which increases rider safety.

Thank you for providing the opportunity to comment on this project and I'm excited to potentially have an opportunity to ride on these new trails!
