Comments: I am writing to express my deep appreciation for all the work the forest service does to support trail systems and to express my enthusiasm for the proposed new trails on Narrowback mountain. The region is becoming a bucket-list destination for mountain bikers from around the country and more trail on Narrowback will help to cement its status as a place not just for experts but for everybody. Narrowback is a great place for those of us who love to ride mountain bikes but are not skilled or brave enough for some of the harder trails in the forest. It is a place I can readily take my spouse and kids. Narrowback is also a lot closer than some of the other trails which just adds to its accessibility. I am very excited to see it happen!
