Comments: Dear Forest Service,

I support the Tillman Trails Connectivity Project and would like to see more relocation of "legacy" trails and new trail construction along the Tillman Road Corridor. This part of the GWNF is quickly becoming a nationally recognized mountain bike destination, and to meet the influx of demand, we need more trails and better trail connectivity in the North River District of the George Washington National Forest. The Narrowback Mountain trail system is unique in that it offers intermediate and beginner trail visitors a more manageable experience compared to the trails off of Reddish Knob.

Additionally, the proximity to the forest boundary is advantageous as it reduces traffic on Route 924 and cuts down on drive time to access the trails.

Sincerely,

Zain Mirza
