Comments: My family of four have spent many enjoyable hours riding Narrowback Mountain and strongly support additional trails in this area. I have found mountain bikers and trail runners to be excellent stewards of the land. The trails are well designed to avoid environmental degradation and I have never seen rubbish left on the trail (we move too fast to leave anything behind). The more options we have to ride the less stress and upkeep is required of the current trails. We travel from Charlottesville, so either on our way to ride or on our way home we stop to by food and gas and thereby contribute to the local economy.

My only concern is that the parking lot should be expanded in addition to trail expansion.
